GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

Risk profile*

Synthetic risk & reward indicator	Lower risk			Higher risk			
	1	2	3	4	5	6	7
		2					

The risk indicator assumes you keep the Sub-Fund for the recommended minimum investment period of 3 years. The actual risk can vary significantly if you cashing-in at early stage and you may get back less.

You may not be able to sell your Sub-Fund easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Sub-Fund compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The historical data used for the calculation of this indicator may not constitute a reliable indication of the future risk profile of the Sub-Fund. The risk category associated with the Sub-Fund is not guaranteed and may change over time. The lowest category does not mean "risk free".

We have classified this product as [2] out of 7, which is a low risk class, due to its exposure to a diversified portfolio of UCIs and managed accounts. This rates the potential losses from future performance at a very low level, and it is very unlikely that poor market conditions could impact our capacity to pay you.

Among the major risks identified by the European texts, the Sub-Fund may be exposed to the following risks, which are not adequately captured by the risk indicator: credit risk, counterparty risk and liquidity risk.

The SRI does not take into account the tax treatment of the Sub-Fund according to the wealth and tax situation of the targeted retail investor. You may not be able to sell it easily or you may have to sell it at a price that will significantly affect the amount you will receive in return. The Sub-Fund does not include any return or capital guarantee against the vagaries of the market. You could lose all or part of the capital invested.

* Please refer to the Prospectus of the Sub-Fund for the details of the risks associated to this Sub-Fund.

The Management Company

Olympia Capital Management SA ("OCM") is a French investment management firm, authorized and regulated by the AMF and based in Paris. MONTHLY REPORTING as of February 28, 2025

GEMS OLYMPIA UCITS FUND - Fixed Income Flexible Strategy

Monthly investment commentary

The Fixed Income Flexible Strategy ("FIS") sub-fund of the Gems Olympia UCITS Fund gained 0,79% in February 2025 (I-USD Unit).

The US equity market experienced volatility in February. The S&P 500 declined 1.4% after being up 2% early in the month. Increasing uncertainty about the impact of the US administration's policies and Trump's tariffs weighed on both corporate and consumer sentiment. A flight to quality during the month, coupled with falling US yields, resulted in positive returns across all major fixed income sectors. Additionally, the weaker dollar supported emerging market debt. Once again, bonds demonstrated their role as diversifiers against equity losses.

Even with the potential for tariffs to trigger inflation and stronger-than-expected inflation data, global bond markets prioritized weaker US sentiment data and the associated growth risks. As a result, the 10-year Treasury yields moved from 4.53% to 4.2% during the month. US high yield bonds (HYG) were up 0.9%. Emerging markets bonds (EMB) were up 2%. Convertibles (CWB) were down -1.3%.

FIS will enter March invested in US high yields bonds, EM bonds and US treasuries, maintaining a low portfolio duration.
